

## Health Screen Information

Prior to internship please provide to TCH:

- Immunization Record
- Proof of Immunity (Titers) for Measles Mumps Rubella (MMR) and Varicella (Chicken Pox).
  - For Clarification, you will need to have titers drawn for these at your physician's office. We apologize for the inconvenience, however, paper documentation of having had the vaccine needs to be supported by the results of your titers.
- Recommended (but not required) Vaccinations:
  - DTaP
  - Hepatitis B (series of 3 shots).
    - You can receive these vaccinations from your physician's office, or get them at TCH, for a fee. It may be more cost-effective to get them at you physician's office.
- On your first day (or as soon as possible), you will be required to have a TB skin test performed (series of two tests over a period of a few weeks), which will indicate whether or not you have been exposed to TB. If you have documented proof that you have already had one TB skin test within the last calendar year you will only need to get one TB skin test at TCH.

\*\* Please note, you have the right to refuse these vaccinations. If you choose to waive these vaccinations, you will be required to sign a waiver that states you understand you will not, under any circumstances, be allowed on the TCH campus when you have a fever, nausea, vomiting, and diarrhea.
